## User

i want create project mananement will you provide me figma i want same like jira type so we can easily trace project status , bugs retroprs , testing bugs, day to day activisties , which employee include in which project what the are doing today so we can also tract their project their task provide me images for that figma

## BLACKBOXAI

You want a Figma-style design or prototype similar to Jira for project management with features like project status tracking, bug reports, retrospectives, testing bugs, day-to-day activities, employee-project-task assignments, and task tracking.

Since I cannot create actual Figma files, I can provide you with detailed, high-quality images/screenshots or mockups representing key screens and UI elements similar to Jira for such a project management app. These images can be used in Figma as design references.

I will prepare several images illustrating:

- Dashboard overview with project status and task summaries
- Bug tracking and testing panel
- Retrospective meeting notes interface
- Employee assignments with today's tasks
- Project details page showing involved employees and task progress

These images will be modern, clean, and visually appealing with user-friendly layout and colors that fit a professional project management tool. That way, you can use them to create or replicate in Figma.

I will prepare 4-5 images showing various key UI screens mimicking Jira-like functions as you requested.

Now I will proceed to generate these images in a single HTML file with inline CSS + JS to simulate the design visually, then I will convert them into images for you to use as reference.

Proceeding with the design creation and image generation.

## Dashboard

Projects

Bugs & Testing

Retrospective

Employees

Tasks Today

## Dashboard Overview

Quick summary of project statuses, tasks, and bugs.

Project Status

Project	Progress	Status
Website Redesign	<div></div>	In Progress
Mobile App	<div></div>	In Progress
API Development	<div></div>	Done

Bug Tracking

ID	Title	Status	Priority
#124	Login button not responsive	Open	High
#130	Crash on submitting form	Blocked	Critical
#135	UI misalignment on mobile	In Progress	Medium
#140	Data sync failure	Open	High

View all bugs

Sprint Retrospective Highlights

- Improve test coverage on the mobile app.
- Address frequent crashes on submission.
- Better documentation for REST APIs.
- Schedule daily standups for dev and QA teams.

## Employee Task Tracker for Today

Employee	Project	Today's Task	Status
JS John Smith	Mobile App	Fix login bug	In Progress
AB Alice Brown	Website Redesign	Create wireframes	Done
MW Mark Wilson	API Development	Code review & deploy	Done
LS Lisa Stern	Mobile App	Write test cases	Open

## Project Detail: Website Redesign

**Project Description:** Revamp the company website for a modern look and improved UX.

Employee	Role	Current Task
AB Alice Brown	UI/UX Designer	Create wireframes & prototypes
DT David Tan	Frontend Developer	Implement responsive header
JS John Smith	QA Engineer	Test new features

### User

want to download

### BLACKBOXAI

I have created a modern and clean project management dashboard mockup inspired by Jira that you can easily use as a Figma design reference.

I will now provide you with a single HTML file containing the entire design. You can download this file and open it in any modern web browser to view the layout and visuals. It will serve as great visual material for your project or for recreating in Figma.

Downloading the file named `project_management_figma_mockup.html` now:

`project_management_figma_mockup.html`
